### Yearly Sewer Average

When you open your bill next month you will notice a change in your sewer charge. Every year we take the average of a residents' December, January and February water usage, to calculate the yearly sewer charge. Using these months gives us an idea of how much water is flowing down the sewer system and not on yards. Once we have the average we use the following formula to calculate the charge:

$(\text{Average Usage})/100 \times 1.08 + \$4.56$

If you have any questions about this process, please don't hesitate to give us a call.
